8. METAL CHIP HOPPER STORAGE AREA

The metal chip hopper storage area was a collection point for all oily machine cuttings and shavings in the Swissvale plant. As machine bins became full the cuttings were emptied into the chip hopper storage area. The oil and coolants would run out of the hopper down a declining 20 ft. concrete ramp and into a collection sump. When the chip hopper was full a vendor would remove it and reimburse the US&S for its metal scrap value. When the sump was filled the material would be removed as a hazardous waste. Typically US&S contracted with AMO Pollution Services, Inc., Canonsburg, PA to haul the oil to Tricil Environmental Services, Inc.in Hilliard,Ohio (Ref.Exhibits 8.1.1, 8.1.2, 8.1.3, and 8.1.4).

The last shipment of these oils left the Swissvale plant on July 16, 1987 and was sent to Tricil Environmental Services (Ref. Exhibits 8.1.3 & 8.1.4).

The roof and supporting structure was torn down and disposed of as scrap during the summer of 1987. In November 1987, the concrete ramp and sump were broken-up and staged on plastic for later disposal. Along with the concrete approximately six feet of soil was removed from under the ramp and sump and staged pending disposal.

On November 24, 1987 two soil samples were taken at the excavation and submitted to the I.T. Corporation laboratories in McMurray, PA for lead and TPH analysis (Ref.Exhibit 8.2.1, 8.2.2, & 8.2.3). Upon receiving the laboratory results the site was back filled with on site fill material and closed on Dec. 9, 1987.

The staged concrete and soil was taken to Cecos Niagara Falls, New York for disposal (Ref.Exhibit 8.3).

Memorandum

To:

V. Srivastava

Date:

December 4, 1987

From:

W. S. Davis WSA /2-4-87

D. A. Wunderlich Drw 12-4-27

Subject:

Analytical Results for Union Switch & Signal Project No. 305301 305959

IT Analytical Services (ITAS) has completed the analysis of the six soil samples received in our laboratory on November 20, 1987. Results are presented in the enclosed tables and were determined in accordance with recommended analytical procedures listed in the Method Reference.

Should you have any questions or require additional information, please contact us at the Pittsburgh Laboratory.

WS

TABLE 1

METALS ANALYSIS SUMMARY FOR UNION SWITCH AND SIGNAL PROJECT NO. 305200

SAMPLE IDENTIFICATION

PARAMETER	UNITS	Chip Hopper Pad: Sample #1	Chip Hopper Pad: Sample #2
Lead, Total	mg/kg ⁽¹⁾	51	140
Lead, E. P. Toxicity	mg/£(2)	0.21	0.39/0.39 ⁽³⁾

⁽¹⁾mg/kg = milligrams per kilogram or parts per million.

 $⁽³⁾_{mg/\ell} = milligrams per liter or parts per million.$

 $^{^{(3)}}$ The sample was prepared and analyzed in duplicate.
